

Name	Description	Details	Photo
<p><i>Actinidia arguta</i> 'Issai' Hardy Kiwi</p>	<p>A fuzz-less kiwi that is exceptionally sweet! Thrives in well-drained soil. This rapid grower requires a sturdy support system. Ripens in late August. Self-pollinating. Prefers a sheltered site.</p>	<p>H 8-12' W 8-12' Zone 4b</p>	
<p><i>Actinidia arguta prolific</i> Hardy Kiwi</p>	<p>Exceptionally sweet fizz-less, grape-sized Kiwi. Thrives in well-drained soil. This rapid grower requires a sturdy support system. Ripens in late August. Self-pollinating. Prefers a sheltered site.</p>	<p>H 8-12' W 8-12' Zone 4</p>	
<p><i>Amelanchier alnifolia</i> 'Smokey Saskatoon' Serviceberry</p>	<p>Produces an abundance of half-inch-diameter purple fruits that are extremely sweet and juicy. Ripens in early summer. Eat fresh off the bush. Xeriscape and appealing to birds.</p>	<p>H 4-6' W 4-6' Zone 2</p>	
<p><i>Fragaria x ananassa</i> 'Albion' Everbearing Strawberry</p>	<p>Produces a bright red strawberry bursting with flavor. Firm texture. High yielding and tolerant of heat.</p>	<p>H 12" W 12-24" Zone 3</p>	
<p><i>Fragaria x ananassa</i> 'Ever Sweet' Everbearing Strawberry</p>	<p>The day length neutral plants produce fruit first in spring and then in subsequent six-week intervals throughout the summer and into fall, displaying good disease resistance through the season.</p>	<p>H 6-10" W 36" Zone 4</p>	

Name	Description	Details	Photo
<p><i>Fragaria x ananassa</i> 'Fort Laramie' Everbearing Strawberry</p>	<p>Large, bright scarlet-red berries with a sweet aroma and delicious taste. Produces many runners that make this variety ideal for ground planting. Bears fruit in early summer. Does best in full sun with well-drained soil.</p>	<p>H 6-10" W 36" Zone 3</p>	
<p><i>Fragaria x ananassa</i> Ozark Beauty Everbearing Strawberry</p>	<p>Produces large, delicious berries with juicy texture. Grows best in full sun with well-drained soil. Blooms with white blossoms May to August.</p>	<p>H 8-10" W 8-12" Zone 4</p>	
<p><i>Fragaria ananassa</i> 'Gassana' Everbearing Pink Strawberry</p>	<p>Combining showy pink flowers and delicious fruit, this everbearing strawberry grows as both an ornamental and edible perennial fruit.</p>	<p>H 12" 24-36" Zone 4</p>	<p>Photo Credit: Walters Gardens Inc.</p> 
<p><i>Fragaria ananassa</i> 'Ruby Ann' Everbearing Strawberry</p>	<p>Combining showy flowers and delicious fruit, this everbearing strawberry grows as both an ornamental and edible perennial fruit. In addition to the sweet, medium sized fruit, 'Ruby Ann' produces beautiful ruby-red flowers,</p>	<p>H 8-12" W 24-36" Zone 4</p>	<p>Photo Credit: Walters Gardens Inc.</p> 
<p><i>Juglans nigra</i> Black Walnut</p>	<p>Attractive, large, hardy, oval. A heritage tree. Grows rapidly when young but slows down with age. Has edible nuts, and the leaves are green throughout the season.</p>	<p>H 40-50' W 25-30' Zone 3</p>	

Name	Description	Details	Photo
<p><i>Lonicera caerulea kamchatica</i> Aurora Haskap Berry or Honeyberry</p>	<p>Sweeter and more productive than other honeyberries, with a slightly larger fruit. Eat fresh or use in baking or in jams and jellies. A good pollinator. Pear with any Honeyberry except Aurora.</p>	<p>H 3-4' W 3-4" Zone 3</p>	
<p><i>Lonicera caerulea</i> Boreal Beast Haskap Berry or Honeyberry</p>	<p>Very productive flavorful medium-sized berries with excellent taste. Ripens in mid-summer. Pollinator for Aurora, Boreals, and Honeybee. Full or partial sun. Helena substitute for blueberries.</p>	<p>H 4-5' W 40-48" Zone 2</p>	
<p><i>Lonicera caerulea</i> Boreal Beauty Haskap Berry or Honeyberry</p>	<p>Very productive flavorful, large berries and strong branches. Pollinator for Aurora, Boreals, and Honeybee. Full or partial sun. Helena substitute for blueberries.</p>	<p>H 4-5' W 40-48" Zone 2</p>	
<p><i>Lonicera caerulea</i> Boreal Blizzard Haskap Berry or Honeyberry</p>	<p>Heavy producer. Largest, heaviest, firm berries with exceptional flavor. Ripens in early to mid-summer, best when hand-picked. Pollinator for Aurora, Boreals, and Honeybee. Excellent mildew and sunscald resistance. Prefers a moist, well-drained soil.</p>	<p>H 5-6' W 4-5" Zone 2</p>	<p>Photo Credit: Bron & Sons</p> 
<p><i>Lonicera caerulea</i> Honeybee Haskap Berry or Honeyberry</p>	<p>Dark blue cylindrical fruit in spring. Ripens in early summer. For use in juice, wine, or jelly. Slightly tart. Pollinates all other Honeyberries except Honeybee. Full sun. Helena substitute for blueberries.</p>	<p>H 4-5' W 4-5" Zone 2</p>	

Name	Description	Details	Photo
<p><i>Lonicera caerulea</i> Polar Jewel Haskap Berry or Honeyberry</p>	<p>A dense, compact. and hardy shrub with clean foliage, producing large, sweet, bluish-purple berries in early summer; must have another honeyberry variety for cross pollination; selected for better fruit production and higher yields.</p>	<p>H 5' W 5' Zone 2</p>	<p>Photo Credit: Mill Creek Nursery</p> 
<p><i>Malus</i> 'Gloria' Apple</p>	<p>Medium-sized, red speckled fruit with a sweet and slightly spicy strawberry flavor. Great for fresh eating and cooking. Prefers a moist, well-drained soil. Requires another apple within a city block for pollination.</p>	<p>H 13' W 13' Zone 3</p>	<p>Photo Credit: Bron & Sons</p> 
<p><i>Malus</i> Kerr Apple Crab</p>	<p>An heirloom with showy clusters of lightly fragrant white flowers with pink overtones emerge in mid spring. Fruits are showy purple and come in abundance in mid fall. Light fall frost enhances the flavor. Excellent for making jams, jellies and the best apple juice or cider ever. Resistant to fire blight and winter hardy.</p>	<p>H 25' W 25' Zone 2</p>	
<p><i>Malus</i> 'Haralred' Apple Tree</p>	<p>Red selection of Haralson apple. Extremely hardy, juicy, firm, tart, and stores well. Ripens in early October. Often bears fruit the first year. Needs pollinator.</p>	<p>H 12-15' W 14' Zone 3</p>	

Name	Description	Details	Photo
<p><i>Malus</i> 'Honeycrisp' Apple Tree</p>	<p>Pinkish-white flowers provide a showy spring display. Later produces large, mottled red over yellow fruit with exceptional flavor and crispness. Keeps up to 7 months. Annual producer. Great for fresh eating, cooking, or pressing for cider. Pollinates well with Snowsweet.</p>	<p>H 20' W 20' Zone 3</p>	
<p><i>Malus</i> 'Prairie Magic' Apple Tree</p>	<p>Stands out because of its exceptional cold hardiness and size of fruit. The flesh is crisp, white, and sweet. Delicious eaten fresh. Needs another mid-season blooming apple for pollination.</p>	<p>H 25-30' W 12-15' Zone 3</p>	
<p><i>Malus wildung</i> 'Snowsweet' Apple Tree</p>	<p>A red apple with a delightfully sweet taste and slight tart balance. The snowy white flesh is slow to turn brown after cutting. Blooms and fruits in mid to late season. Very cold hardy and disease resistant. Pollinates well with Honeycrisp.</p>	<p>H 15' W 15' Zone 3</p>	
<p><i>Prunus cerasus</i> 'Evans Bali Cherry'</p>	<p>Deep, dark red fruit 1" in diameter and excellent for baking and fresh eating. The fruit is semi-sweet. Perfect for pies. Extremely hardy buds. A small tree.</p>	<p>H 15' W 15' Zone 2</p>	<p>Photo Credit: Bailey Nurseries</p> 

Name	Description	Details	Photo
<p><i>Prunus x Kerrasis</i> 'SK <i>Carmine Jewel</i> Carmine Jewel Bush Cherry</p>	<p>Produces loads of wine-colored cherries in August. Fruits have a small pit and are excellent for toppings, pies, or preserves. Self-pollinating.</p>	<p>H 5-6' W 5-6' Zone 2</p>	
<p><i>Prunus x kerrasis</i> 'Juliet' Cherry</p>	<p>Notably lower acidity and high sweetness make this one of the best cherries for eating fresh. Fruits have large pits. Harvest in late summer. Very cold hardy.</p>	<p>H 5-6' W 5-6' Zone 2</p>	
<p><i>Prunus americana</i> 'American' Plum</p>	<p>A native plum. Fragrant showy large white flowers with bright red fruit in August or September. Fall foliage ranges from electric red to pale yellow. Plums eaten fresh or used in jellies and preserves.</p>	<p>H 10-12' W 10-12' Zone 3</p>	
<p><i>Prunus</i> 'Mount Royal' Plum Tree</p>	<p>European semi-dwarf variety that tastes great when eaten right off the tree. Tender and juicy fruit. Ripens in mid-August. Self-fertilizing, no pollinator tree needed. Considered the best hardy blue cultivar. Needs protection, use tree wrap in the winter.</p>	<p>H 8-12' W 8-12' Zone 4</p>	

Name	Description	Details	Photo
<p><i>Prunus</i> 'Superior' Plum Tree</p>	<p>One of the best plums available on the market today. Dark red fruit is sweet and juicy. Ideal for eating fresh, or in jams or jellies. Ripens late August and often sets fruit the first year. Recommend American, Toka, or Waneta plum for pollination.</p>	<p>H 15' W 15' Zone 4</p>	
<p><i>Prunus</i> 'Toka' Plum Tree</p>	<p>One of the best plum pollinators but does require another pollinator. The fruit has reddish-bronze skin with richly flavored, apricot-colored flesh. Produces heavy crops that ripen late August into September. Cross with a native plum.</p>	<p>H 10-15' W 10-15' Zone 3</p>	
<p><i>Prunus</i> 'Waneta' Plum Tree</p>	<p>One of the best American plums. The fruit is large, reddish, sweet, juicy and of excellent quality. Ripens in August and produces well the first season. Needs a pollinator. Suggest Superior or Toka. Cross with a native plum.</p>	<p>H 10-15' W 10-15' Zone 3</p>	
<p><i>Prunus virginiana</i> Chokecherry</p>	<p>Native to the Rocky Mountains. A large shrub or small tree that will withstand harsh conditions. Xeriscape plant.</p>	<p>H 15-20' W 10-15' Zone 3</p>	

Name	Description	Details	Photo
<p><i>Pyrus communis</i> Chadwick/Flemish Beauty Pear</p>	<p>Large flavor filled variety that produces tasty fruit. The exterior of the pear is a creamy yellow color that flushes red when ripe. It was originally known as the “Sweetmeat of the Woods.” Fruits ripen in mid-September to October.</p>	<p>H 15’ W 15’ Zone 4</p>	
<p><i>Pyrus parker</i> ‘Parker’ Pear Tree</p>	<p>This upright tree produces large, yellow fruit with a red blush. It is very productive and vigorous. It will need a pollinator.</p>	<p>H 15’ W 15’ Zone 4</p>	
<p><i>Pyrus</i> ‘Summercrisp’ Pear Tree</p>	<p>This pear tree is an annual bearer. The fruit itself is a pyramidal form shape that is about 3 inches in diameter and 3.5 inches long. Blooms appear in early May and harvest the fruit in mid-August. Use Parker for pollinator.</p>	<p>H 15’ W 15’ Zone 3</p>	
<p><i>Rheum rhabarbarum</i> ‘Canada/Crimson Red’ Rhubarb</p>	<p>Large green foliage atop deep crimson-red stalks. Agreeably tart and great for pies or preserves.</p>	<p>H 24-48” W 24” Zone 3</p>	

Name	Description	Details	Photo
<p><i>Rubus idaeus</i> Boyne Raspberry</p>	<p>An attractive, red raspberry with a delicious, sweet flavor. Very productive and hardy, producing juicy berries in early July.</p>	<p>H 3-4' W 3-4' Zone 3</p>	
<p><i>Rubus idaeus</i> Fall Gold Raspberry</p>	<p>A rare and exciting raspberry with the same delicious taste as red varieties. Produces a second crop after a late summer to fall harvest. Magnificent gold berries.</p>	<p>H 4' W 3' Zone 3</p>	
<p><i>Rubus idaeus</i> Souris Raspberry</p>	<p>Souris is an improved red, summer-bearing raspberry that ripens in July. This self-pollinating plant is sweeter than the Boyne raspberry and produces more fruits. Also, this shrub is better at spider-mite resistance overall.</p>	<p>H 3-4' W 3-4' Zone 3</p>	
<p><i>Sambucus</i> York Elderberry</p>	<p>Largest berries of all elderberries. Juicy, sweet, purplish black berries. Good for jam, jelly, pie, and wine. Hardy, vigorous, highly productive bush. Large, creamy white flowers in early summer and nice fall foliage.</p>	<p>H 6-8' W 6-8' Zone 4</p>	

Name	Description	Details	Photo
<p><i>Vitis hybrida</i> 'Edelweiss' Hybrid Grape</p>	<p>Produces medium-sized fruit that is sweet and pleasantly flavored. Green-white color with high sugar content. Perfect for eating fresh or making white wine.</p>	<p>H 10-15' W 3-4' Zone 4</p>	
<p><i>Vitis hybrida</i> 'Kay Gray' Hybrid Grape</p>	<p>This hardy white grape is perfect for eating directly off the vine or for wine production. This vine produces medium to large berries in small clusters.</p>	<p>H 10-30' W 2-3' Zone 4</p>	
<p><i>Vitis hybrida</i> 'Somerset' Seedless Hybrid Grape</p>	<p>This seedless table or juice grape has a superb flavor. It bears tight clusters with small, deep-red berries. Earliest edible berries produced in the pink stage, which usually occurs in August. However, if plucked at full red, these delicious fruits are sweeter and more flavorful.</p>	<p>H 4-6' W 1-2' Zone 4</p>	<p>Photo courtesy of Bailey Nurseries</p> 
<p><i>Vitis labrusca hybrida</i> 'Valiant' Hybrid Fox Grape</p>	<p>A very hardy grape vine with dark purple fruit. Green leaves turn golden yellow in fall. Fruits are excellent for jams, jellies and juice or wine.</p>	<p>H 20' W 2' Zone 2</p>
