

Name	Description	Details	Photo
<i>Amelanchier alnifolia</i> 'Smokey Saskatoon' Serviceberry	Produces an abundance of half inch-diameter purple fruits that are extremely sweet and juicy. Ripens in early summer. Excellent eaten off the bush. Xeriscape and appealing to birds.	H 4-6' W 4-6' Zone 2	
<i>Fragaria x ananassa</i> 'Albion' Everbearing Strawberry	Produces a bright red strawberry bursting with flavor. Firm texture. High yielding and tolerant of heat.	H 12" W 12-24" Zone 3	
<i>Fragaria x ananassa</i> 'Fort Laramie' Everbearing Strawberry	Large, bright scarlet-red berries with a sweet aroma and delicious taste. Produces many runners that make this variety ideal for ground planting. Bears fruit in early summer. Does best in full sun with well-drained soil.	H 6-10" W 36" Zone 3	
<i>Fragaria 'Berry Hill Montana'</i> Strawberry Berries Hill Montana	A great choice for hanging baskets. Produces beautiful blooms and sweet berries.	H 10-12" W 10-12" Zone 4	Photo Credit: Ball Seed Company 

Name	Description	Details	Photo
<i>Fragaria</i> Summer Breeze Rose Strawberry	Beautiful rose-shaped double flowers and delicious, juicy, bright red berries. The unique semi-double flowers hold on to their petals for lots of color on the plant. Deep pink flowers.	H 12-16" W 12-16" Zone 3	Photo Credit: Ball Seed Company 
<i>Juglans nigra</i> Black Walnut	Attractive, large, hardy, oval. A heritage tree. Grows rapidly when young but slows down with age. It has edible nuts, and the leaves are green throughout the season.	H 40-50' W 25-30' Zone 3	
<i>Lonicera caerulea kamchatica</i> Aurora Haskap Berry or Honeyberry	Sweeter and more productive than other honeyberries, with a slightly larger fruit. Eat fresh or use in baking or in jams and jellies. A good pollinator. Pair with any Honeyberry except Aurora.	H 3-4' W 3-4' Zone 3	
<i>Lonicera caerulea</i> Indigo Gem Haskap Berry or Honeyberry	Easy-to-grow berry that tolerates poor soil and is not bothered by pests or diseases. Mid-June fleshy berries are sweet and tart with a blueberry-like flavor; wonderful fresh or dried. Yields 5 to 10 lbs. of fruit. Requires cross-pollination by varieties with a similar bloom time, such as Polar Jewel or Aurora.	H 4-5' W 4-5' Zone 2	Photo Credit: McKay Nurseries 
<i>Lonicera caerulea</i> Polar Jewel Haskap Berry or Honeyberry	A dense, compact, and hardy shrub with clean foliage, producing large, sweet, bluish-purple berries in early summer; must have another honeyberry variety for cross pollination; selected for better fruit production and higher yields. <i>Malus</i> 'Gloria' Apple	Medium-sized, red speckled fruit with a sweet and slightly spicy strawberry flavor. Great for eating and cooking. Prefers a moist, well-drained soil. Requires another apple within a city block for pollination.	H 13' W 13' Zone 3	Photo Credit: Bron & Sons 
<i>Malus</i> 'Gravenstien' Apple Crab	These classic apples are synonymous with great applesauce and delicious pies. A traditional favorite for cooking, their crisp and juicy flesh has a tart edge that makes them a popular choice for fresh eating. Early blooming, early harvest, and very cold hardy.	H 18-25' W 8-10' Zone 2	Photo Credit: Trees of Antiquity 
<i>Malus</i> 'Kerr' Apple Crab	An heirloom with showy clusters of lightly fragrant white flowers with pink overtones emerge in mid spring. Fruits are showy purple and come in abundance in mid fall. Light fall frost enhances the flavor. Excellent for making jams, jellies and the best apple juice or cider ever. Resistant to fire blight and winter hardy.	H 25' W 25' Zone 2	
<i>Malus</i> 'Kudos' Apple Crab	Attractive, well-colored fruit with a unique combination of traits including an excellent crisp, juicy texture and a sweet, well-balanced flavor with occasional tropical overtones. Needs pollinator and harvests in late September.	H 12-15' W 12-15' Zone 4	Photo Courtesy of Minnesota Hardy 

Name	Description	Details	Photo
<i>Malus</i> 'Haralred' Apple	Red selection of Haralson apples. Extremely hardy, juicy, firm, tart, and stores well. Ripens in early October. Often fruits the first year. Needs pollinator.	H 12-15' W 14' Zone 3	
<i>Malus</i> 'Honeycrisp' Apple	Pinkish-white flowers provide a showy spring display. Later produces large, mottled red over yellow fruit with exceptional flavor and crispness. It lasts for up to 7 months. Annual producer. Great for fresh eating, cooking, or pressing for cider. Pollinates well with Snowsweet.	H 20' W 20' Zone 3	
<i>Malus</i> 'Norland' Apple	One of the earliest summer apples to ripen. Well suited to very cold regions. A natural semi-dwarf tree that is precocious and productive. Attractive color, small to medium fruit. Great eating and cooking. It is winter hardy. Keeps for about 16 weeks in cold storage. Fruit must be picked before full maturity for storage or use.	H 15-17' W 15-17' Zone 2	Photo Credit Baileys Nursery 
<i>Malus</i> 'Prairie Magic' Apple	Stands out because of its exceptional cold hardiness and size of fruit. The flesh is crisp, white, and sweet. Delicious eaten fresh. Needs another mid-season blooming apple for pollination.	H 25-30' W 12-15' Zone 3	

Name	Description	Details	Photo
<i>Malus</i> 'State Fair' Apple	Medium-sized red striped fruit. The flavor is sprightly tart and good for eating and baking. Good texture, semi-acid to sweet. All-purpose apple. One of the better early apples for northern locations. Short storage life.	H 20' W 20' Zone 3	Photo Credit: Minors Garden Center 
<i>Malus</i> 'Yellow Transparent' Apple	The skin is clear yellow, and the flesh is white. A very productive tree. Best used for cooking. Heavy producer. Pick before maturity for better storage life. Scab resistant.	H 12-15' W 12-15' Zone 3	Photot Credit Baileys Nursery 
<i>Malus</i> 'Zestar' Apple	An early apple that is crisp and juicy! Best known for its excellent sweet tart flavor, it has a much longer storage life than other early apples. Excellent for fresh eating and cooking. Ripens in late August.	H 12-15' W 12-15' Zone 3	Photo Credit Baileys Nursery 
<i>Prunus apricot fruiting</i> 'Moorpark' Apricot	Moorpark apricot is a traditional European variety prized for its exceptionally sweet, rich flavor and juicy, golden-orange flesh. It produces large fruit that ripens in mid to late summer and is excellent for fresh eating, drying, and preserves. The tree is self-fertile.	H 15-20' W 15-20' Zone 4	Photo Credit TN Nursery 

Name	Description	Details	Photo
<i>Prunus apricot fruiting</i> 'Robada' Apricot	Large flavorful freestone with a bright red, attractive blush over a deep orange skin. Known for being juicy, sweet-tart, and typically ripens early summer. Excellent for fresh eating, drying and jams. Vigorous, highly productive, and disease resistant.	H 12-15' W 12-15' Zone 4b	Photo Credit: Stark Brothers 
<i>Prunus cerasus</i> 'Evans Bali' Cherry	Deep, dark red fruit 1" in diameter and excellent for baking and fresh eating. The fruit is semi-sweet. Perfect for pies. Extremely hardy buds. A small tree.	H 15' W 15' Zone 2	Photo Credit: Bailey Nurseries 
<i>Prunus x kerrasis</i> 'Juliet' Cherry	Notably lower acidity and high sweetness make this one of the best cherries for eating fresh. Fruits have large pits. Harvest in late summer. Winter hardy.	H 5-6' W 5-6' Zone 2	
<i>Prunus tomentosa</i> Nanking Cherry	Spreading, deciduous, Flower is fragrant, long lasting, Pink or white, and Thrives in normal to moist soil.	H 6-10 W 15 Zone 2	Photot Credit McKay Nursery 

Name	Description	Details	Photo
<i>Prunus americana</i> 'American' Plum	A native plum. Fragrant showy large white flowers with bright red fruit in August or September. Fall foliage ranges from electric red to pale yellow. Plums eaten fresh or used in jellies and preserves.	H 10-12' W 10-12' Zone 3	
<i>Prunus</i> 'Mount Royal' Plum	European semi-dwarf variety that tastes great when eaten right off the tree. Tender and juicy fruit. Ripens in mid-August. Self-fertilizing needs no pollinator. Considered the best hardy blue cultivar. Needs protection, use tree wrap in the winter.	H 8-12' W 8-12' Zone 4	
<i>Prunus</i> 'Superior' Plum	One of the best plums available on the market today. Dark red fruit is sweet and juicy. Ideal for eating, or in jams or jelly. Ripens late August and often fruit the first year. Recommend American, Toka, or Waneta plum for pollination.	H 15' W 15' Zone 4	
<i>Prunus</i> 'Toka' Plum	One of the best plum pollinators but does require another pollinator. The fruit has reddish-bronze skin with richly flavored, apricot-colored flesh. Produces heavy crops that ripen late August into September. Cross with a native plum.	H 10-15' W 10-15' Zone 3	

Name	Description	Details	Photo
<i>Prunus</i> 'Waneta' Plum	One of the best American plums. The fruit is large, reddish, sweet, juicy and of excellent quality. Ripens in August and produces well the first season. Needs a pollinator. Suggest Superior or Toka or cross with a native plum.	H 10-15' W 10-15' Zone 3	
<i>Prunus virginiana</i> Chokecherry	Native to the Rocky Mountains. A large shrub or small tree that will withstand harsh conditions. Xeriscape plant.	H 15-20' W 10-15' Zone 3	 Photo Credit: Bailey Worsener
<i>Pyrus communis</i> Chadwick/Flemish Beauty Pear	Large flavor filled variety that produces tasty fruit. The exterior of the pear is a creamy yellow color that flushes red when ripe. It was originally known as the "Sweetmeat of the Woods." Fruits ripen in mid-September to October.	H 15' W 15' Zone 4	
<i>Pyrus</i> 'Luscious' Pear	Early maturing. Delicious and juicy fruit that is bright yellow and blushed with red. Disease resistant to fire blight.	H 20 W 15 Zone 4	Photo Courtesy of Applewood Nursery 

Name	Description	Details	Photo
<i>Pyrus parker</i> 'Parker' Pear	This upright tree produces large, yellow fruit with a red blush. It is very productive and vigorous. It will need a pollinator.	H 15' W 15' Zone 4	
<i>Pyrus</i> 'Summercrisp' Pear	This pear tree is an annual bearer. The fruit itself is a pyramidal form shape that is about 3 inches in diameter and 3.5 inches long. Blooms appear in early May and harvest the fruit in mid-August. Use Parker for pollinator.	H 15' W 15' Zone 3	
<i>Rheum rhabarbarum</i> 'Canada Red/Crimson' Rhubarb	Large green foliage atop deep crimson-red stalks. Agreeably tart and great for pies or preserves.	H 24-48" W 24" Zone 3	
<i>Ribes uva-crispa</i> 'Hinnomaki' Red Gooseberry	It is almost thornless and picks well. Mildew resistant. Large, oval, berries become dark red in mid-summer when ripe and ready for eating on old wood. Delicious in pies and jellies.	H 4' W 6' Zone 4	Photo Credit Mckay Naurser 

Name	Description	Details	Photo
<i>Rubus idaeus</i> Boyne Raspberry	An attractive red raspberry with a delicious, sweet flavor. Very productive and hardy, producing juicy berries in early July.	H 3-4' W 3-4' Zone 3	
<i>Rubus idaeus</i> Fall Gold Raspberry	A rare and exciting raspberry with the same delicious taste as red varieties. Produces a second crop after a late summer to fall harvest. Magnificent gold berries.	H 4' W 3' Zone 3	
<i>Rubus idaeus</i> Souris Raspberry	Souris is an improved red, summer-bearing raspberry that ripens in July. This self-pollinating plant is sweeter than the Boyne raspberry and produces more fruits. Also, this shrub is better at spider-mite resistance overall.	H 3-4' W 3-4' Zone 3	
<i>Sambucus</i> York Elderberry	Largest berries of all elderberries. Juicy, sweet, purplish black berries. Good for jam, jelly, pie, and wine. Hardy, vigorous, highly productive bush. Large, creamy white flowers in early summer and nice fall foliage.	H 6-8' W 6-8' Zone 4	

Name	Description	Details	Photo
<i>Vitis hybrida</i> 'Kay Gray' Hybrid Grape	This hardy white grape is perfect for eating directly off the vine or for wine production. This vine produces medium to large berries in small clusters.	H 10-30' W 2-3' Zone 4	
<i>Vitis labrusca hybrida</i> 'Valiant' Hybrid Fox Grape	A very hardy grape vine with dark purple fruit. Green leaves turn golden yellow in fall. Fruits are excellent for jams, jellies and juice or wine.	H 20' W 2' Zone 2
