

Name	Description	Details	Photo
Actinidia <i>arguta</i> Issai Hardy Kiwi	A fuzz-less kiwi that is exceptionally sweet! Thrives in well drained soil. Rapid grower, requires a sturdy support system. Ripens in late August. Self-pollinating.	H 8-12' W 8-12' Zone 5	
Actinidia <i>arguta</i> kolomikta Arctic Beauty Variegated Male Hardy Kiwi	Heart shaped foliage that opens purple, matures to bright green and marked with splashes of white and pink. Fragrant flowers hide behind foliage. Will pollinate up to six female plants. Will not produce fruit unless you have more than three plants.	H 12-16' W 15' Zone 4	
Actinidia <i>arguta</i> kolomikta Red Beauty Female Hardy Kiwi	Deep green foliage with showy red fall color. Small white fragrant flowers. Produces plentiful sweet fruit after 3 years, great for fresh eating.	H 20' W 24" Zone 3	
Amelanchier <i>alnifolia</i> Smokey Saskatoon	Produces an abundance of ½ inch diameter purple fruits that are very sweet and juicy. Ripens in early summer.	H 8-10' W 12-15' Zone 2	
Fragaria x <i>ananassa</i> Albion Strawberry	Produces a bright red strawberry bursting with flavor due to a high sugar content. Firm texture and superior flavor. High yielding and tolerant of heat and humidity.	H 12" W 12-24" Zone 4	

Name	Description	Details	Photo
Fragaria x <i>ananassa</i> Fort Laramie Strawberry	Large, bright scarlet-red berries with a sweet aroma and delicious taste. Produces in early summer. Does best in full sun with well-drained soil.	H 6-9" W 12-18" Zone 4	
Fragaria x <i>ananassa</i> Ozark Beauty Strawberry	Produces large, delicious berries with sugary taste and juicy texture. Grows best in full sun with well-drained soil. Blooms with white blossoms May to August.	H 8-10" W 8-12" Zone 4	
Fragaria x <i>ananassa</i> Ruby Ann Strawberry	Produces showy, ruby red flowers along with delicious, medium sized strawberries. Thrives in rich, well drained potting soil and full sun.	H 8-12" W 24-36" Zone 4	
Juglans <i>nigra</i> Black Walnut	Grows best in a sunny, open location with moist, rich soil. Grows rapidly when young but slows down with age. Has edible nuts and leaves are green throughout the season.	H 60-70' W 50-70' Zone 4	
Lonicera <i>caerulea</i> <i>kam</i> Aurora Honey Berry	Sweeter and more productive than other Honey Berries, with a slightly larger fruit. Can be eaten fresh, used in baking and as jams and jellies. A good pollinator.	H 3-4' W 3-4' Zone 3	

Name	Description	Details	Photo
Lonicera <i>caerulea</i> var. <i>kamchatica</i> Berry Blue Honey Berry	Large blueberry tasting fruit great for fresh eating, making jams and jellies or baked into pies. A good pollinator. Hardy and drought tolerant.	H 4' W 3' Zone 3	
Lonicera <i>caerulea</i> var. <i>kamchatica</i> Boreal Blizzard Honey Berry	The heaviest producer of large, blue edible berries of all the honeyberries on the market. The fruit has been described as a cross between blueberry, blackberry and raspberry!	H 3-4 ' W 3-4 ' Zone 2	
Lonicera 'Indigo Gem' Honey Berry	Short oval fruit with thicker skin and flesh than other varieties making it chewier, like a grape. Produce consistent large yields.	H 4' W 4' Zone 2	
Malus Kerr Applecrab	Showy clusters of lightly-fragrant white flowers with pink overtones emerge in mid spring. Fruits are showy purple and come in abundance in mid fall. Excellent for making jams or jellies.	H 25' W 25' Zone 2	
Malus Cortland Apple	Medium sized-red skin with juicy white flesh. Very productive tree. Fruits are great for eating fresh, cooking, or salads.	H 30' W 25' Zone 4	

Name	Description	Details	Photo
Malus Goodland Apple	Fruit is crisp, juicy, tender, and aromatic. Excellent medium-sized apple for eating and baking. Needs another mid-season blooming apple for pollination.	H 12-25' W 15-25' Zone 3	
Malus Goodmac Apple	A cross between Goodland and McIntosh. The fruits are straw-colored and ripen in September. Excellent dessert apple and stores well.	H 16' W 13-16' Zone 3	
Malus Haralred Apple	Red selection of Haralson Apple, same great qualities. Extremely hardy, juicy, firm, tart, and stores well. Ripens in early October. Needs pollinator.	H 12-15' W 14' Zone 3	
Malus Honeycrisp Apple	Pinkish white flowers provide a snowy spring display. Later produces large, red fruit with exceptional flavor and crispness. Great for fresh eating, cooking or pressing for cider.	H 20-25' W 10-15' Zone 4	
Malus Northern Lights Apple	Large red fruit, 3 inches in diameter, ripens in mid-September. Slightly tart and fruity flavor. Excellent resistance to severely cold winter temperatures.	H 10-15' W 10-15' Zone 3	

Name	Description	Details	Photo
Malus Prairie Magic Apple	Stands out because of its exceptional cold hardiness. The flesh is crisp, white and sweet. Delicious eaten fresh. Needs another mid-season blooming apple for pollination.	H 25-30' W 12-15' Zone 3	
Malus <i>wildung</i> Snowsweet Apple	A red apple with a delightful sweet taste and slight tart balance. The snowy white flesh is very slow to turn brown after cutting. Blooms and fruits mid to late season.	H 15' W 15' Zone 4	
Prunus avium Lapin Sweet Cherry	This self-fertilizing tree produces large crops of dark, sweet fruit. The dark purple-red fruit blossoms into showy, bright pink flowers in the mid-spring. This tree does need more protection than most, as it is less hardy. Likes a protected area.	H 18' W 18' Zone 4	
Prunus <i>cerasus</i> Evans Cherry	Beautiful, compact fruit tree, perfect for the backyard. Sweeter than other sour cherries. Ideal for sauce, jam, and wine. Hardy, naturally dwarf tree. No need for pollinator.	H 15-20' W 10-12' Zone 3	
Prunus <i>cerasus</i> x <i>P. fruticosa</i> Carmine Jewel Cherry	Produces loads of wine-colored cherries in August. Fruits have a small pit and are excellent for fresh eating, pies, or preserves.	H 5-6' W 5-6' Zone 2	

Name	Description	Details	Photo
Prunus <i>cerasus</i> x <i>P. fruticosa</i> Juliet Cherry	Notably lower acidity and high sweetness make this one of the best cherries for eating fresh. Fruits have large pits. Very cold hardy.	H 5-6' W 5-6' Zone 2	
Prunus <i>americana</i> 'American' Plum	Spreading branches, broad crown, fragrant showy large white flowers with bright red fruit in August or September. Fall foliage ranges from electric red to pale yellow. Plums are great eaten fresh, or used in jellies and preserves.	H 12-20' W 12-20' Zone 4	
Prunus <i>salicina</i> Prunus Assiniboine Plum	Round, heart shaped fruit ranging from green to yellow to brilliant red to deep purple black. Larger and juicier than other plums.	H 15-20' W 15-20' Zone 4	
Prunus Moongold Apricot	Light orange colored apricot. Flavor is sweet, but with a slight acidity. Blooms 3 rd week of April. Ripens before Sungold, which is the recommended pollinator.	H 10-15' W 8-12' Zone 4	
Prunus Sungold Apricot	Produces medium sized apricots that are brightly colored gold with attractive orange blush. Produces best when planted with a 'Moongold' apricot.	H 10-15' W 8-12' Zone 4	

Name	Description	Details	Photo
Prunus Westcot Apricot	Orange-red fruit ripens in late July. Fruit is mildly sweet and juicy. Excellent for eating or canning. Self pollinating but yields improve with pollinator.	H 15-20' W 12-18' Zone 3	
Prunus Contender Peach	This tree produces freestone peaches with bright yellow flesh that turns a reddish hue. This tree is very cold-hardy and tolerant of spring frosts. Sweet, extra juicy fruit is outstanding for baking, canning, freezing, and eating fresh. This 'Contender' peach is a self-pollinating tree that blooms in early May and ripens in mid to late August.	H 12-15' W 15-18' Zone 4	
Prunus Alderman Plum	Blooms white blossoms mid season followed by huge, dark red, sweet and juicy fruit. Often valued as an ornamental. 'Superior' and 'Waneta' Plums are recommended pollinators.	H 15-20' W 16' Zone 3	
Prunus Black Ice Plum	Delicious, large, purple fruits are perfect for fresh eating and cooking. Ripens in early August, 2-4 weeks earlier than other plums. Compact size for easy access. Needs another tree for pollination.	H 8-12' W 8-10' Zone 4	
Prunus Mount Royal Plum	European plum that tastes great when eaten right off the tree. Tender and juicy fruit. Ripens in mid-August. Self-fertilizing, no pollinator tree needed.	H 8-12' W 6-10' Zone 4	

Name	Description	Details	Photo
Prunus Superior Plum	One of the best plums available on the market today. Dark red fruit is sweet and juicy. Ideal for eating fresh, jams, or jellies. Ripens late August. Recommend Toka plum for pollination.	H 15-20' W 15-20' Zone 4	
Prunus Toka Plum	One of the best pollinator plums. The fruit has a reddish-bronze skin with richly flavored, apricot colored flesh. Produces heavy crops that ripen in late August into September.	H 10-13' W 10-12' Zone 3	
Prunus Waneta Plum	One of the best American Plums. Fruit is large, reddish, sweet, juicy and of good quality. Ripens in August. Needs a pollinator.	H 10-15' W 10-15' Zone 3	
Pyrus <i>communis</i> Chadwick/Flemish Beauty Pear	Large flavor filled variety that produces tasty fruit. The exterior of the pear is a creamy yellow color that flushes red when ripe. It was originally known as the "Sweetmeat of the Woods." Fruits ripen in mid-September to October.	H 10-20' W 5-10' Zone 4	
Pyrus <i>communis</i> Patten Pear	This pear is a good size, very tender, and extremely juicy. This tree is an excellent pollinator for other pear trees. Furthermore, it serves as a good canning pear.	H 12-15' W 8-12' Zone 4	

Name	Description	Details	Photo
Pyrus <i>parker</i> Parker Pear	This upright tree produces large, yellow fruit with a red blush. It is very productive and vigorous. It will need a mid to late season pollinator.	H 15' W 15' Zone 4	
Pyrus Summercrisp Pear	This pear tree is an annual bearer. The fruit itself is a pyramidal form shape that is about 3" in diameter and 3.5" long. Blooms appear in early May, and the fruit should be harvested in mid-August. Use Parker or Patten for pollinator.	H 12-15' W 8-12' Zone 3	
Rheum Canada Red	The long, thick, dark stems have a sweet and juicy flavor. Only the stems are edible, as the rest of the plant is poisonous. This perennial features bold spikes of white flowers in the early to mid-summer. Best in full sun to partial shade.	H 4' W 3' Zone 2	
<i>Rheum x coltorum</i> German White	This German White Rhubarb is one of the sweetest varieties and excellent for processing and serves as a source for tasty wine. At the beginning of the season, long, green stalks form in thick clusters, then as time passes, the stalks will turn a bright red color. This plant thrives in rich, well-drained soil, and it is resistant to wilt and rot. Though be careful, the leaves are toxic.	H 24-30" W 30-36" Zone 3+	
Rheum <i>rhabarbarum</i> Crimson Red Rhubarb	Large green foliage atop deep crimson red stalks. Agreeably tart and great for pies or preserves.	H 24-48" W 24" Zone 3	

Name	Description	Details	Photo
<i>Rheum rhabarbarum</i> MacDonald Rhubarb	Large, excellent producer, vigorous, upright stain, and nice red color. Wonderful for pies, canning, and freezing. Resistant to wilt and root rot.	H 24-48" W 24" Zone 3	
<i>Ribes oxy.</i> Jahn's Prairie Gooseberry	This gooseberry bush is a part of the Alberta selection. White, mid-spring blooms develop into red-pink berries. This shrub tolerates most soils and is resistant to mildew, pine blister rust, sawflies, and aphids. This wonderful, self-pollinating plant is perfect for jams, jellies, and scrumptious deserts. This plant does well in full sun.	H 4-5ft' W 4-5' Zone 3+	
<i>Rubus idaeus</i> Boyne Raspberry	An attractive, red raspberry with a delicious, sweet flavor. Very productive and hardy, producing juicy berries in early July.	H 3-4' W 3-4' Zone 3	
<i>Rubus idaeus</i> Fall Gold Raspberry	A rare and exciting raspberry with the same delicious taste as red varieties. Produces a second crop after a late summer to fall harvest. Magnificent gold berries.	H 4' W 3' Zone 3	
<i>Rubus idaeus</i> Souris Raspberry	'Souris' is an improved red, summer-bearing raspberry that ripens in July. This self-pollinating plant is sweeter than the 'Boyne' Raspberry and produces more fruits. Also, this shrub is better at spider mite resistance overall.	H3-4' W 3-4' Zone 3	

Name	Description	Details	Photo
Sambucus Elderberry Bob Gordon Elderberry	¼" fruit in July on huge clusters hidden from birds on weeping branches. Long growing season.	H 5-6' Zone 4	
Sambucus Elderberry Marge Elderberry	This is a hybrid between the American Sambucus canadensis and European Sambucus nigra. The berries are larger. Self-pollinating. Great for jam, jelly, juice, syrup or pies.	H 5-8' Zone 4	
Sambucus Elderberry York Elderberry	Largest berries of all elderberries. Juicy, sweet, purplish black berries. Good for jam, jelly, pie and wine. Hardy, vigorous, highly productive bush. Large creamy white flowers in early summer and nice fall foliage.	H 6-8' Zone 4	
Vitis <i>hybrida</i> 'Edelweiss' Edelweiss Grape	Produces medium sized fruit that is sweet and pleasantly flavored. Green-white color with high sugar content. Perfect for eating fresh or making white wine.	H 10-15' W 3-4' Zone 4	
Vitis Kay Gray Grape	This hardy white grape is perfect for eating directly off the vine or for wine production. This vine produces medium to large berries in small clusters.	H 10-30' W 2-3' Zone 4	

Name	Description	Details	Photo
Vitis Somerset Seedless Grape	This seedless table or juice grape has a superb flavor. It bears tight clusters with small, deep red berries. Earliest edible berries are produced in the pink stage which usually occurs in August. However, if plucked at full red, these delicious fruits are sweeter and more flavorful.	H 4-6' W 1-2' Zone 4	
Vitis Valiant Grape	A very hardy grape vine with dark purple fruit. Green leaves turn golden yellow in fall. Fruits are excellent for jams and jellies.	H 20' W 2' Zone 2
